What's covered

- ✓ **DMAIC in full depth:** deliverables, tools, and gate review criteria for each phase
- ✓ **Project Charter:** defining scope, problem statement, goal statement, team, and timeline
- ✓ **SIPOC diagrams:** mapping suppliers, inputs, process, outputs, and customers at a macro level
- ✓ **Voice of the Customer (VoC):** surveys, interviews, complaints analysis, and translating VOC into CTQs
- ✓ **Process mapping:** swim-lane maps, value-add analysis, and identifying quick wins vs. bigger projects
- ✓ **Basic statistics:** mean, median, mode, standard deviation, and what variation really means in a process
- ✓ **Measurement System Analysis (MSA):** gauge R&R basics and understanding measurement error
- ✓ **Root cause analysis:** fishbone diagrams, 5 Whys, interrelationship diagrams, and prioritisation matrices
- ✓ **Basic hypothesis testing:** understanding p-values and using data to confirm root causes
- ✓ **Control plans & SPC:** sustaining improvements with control charts, response plans, and handover documentation

By the end, you'll be able to

- ✓ Lead a scoped Yellow Belt improvement project from Define through to Control
- ✓ Write a project charter and get sponsorship sign-off from a line manager or director
- ✓ Run a VOC exercise and translate customer feedback into measurable project targets
- ✓ Map a process in detail, identify waste and variation, and prioritise improvement opportunities
- ✓ Collect and analyse basic process data to confirm problems and verify solutions
- ✓ Facilitate a root cause analysis session with a cross-functional team
- ✓ Build a control plan to hand over to the process owner after the project closes

How the exam works

A 40-question final exam, taken online whenever you feel ready. Score 70% or higher to pass — you get unlimited attempts, so there's no pressure. Learn at your own pace, revisit any lesson, and sit the exam only when you're confident.

What you'll receive

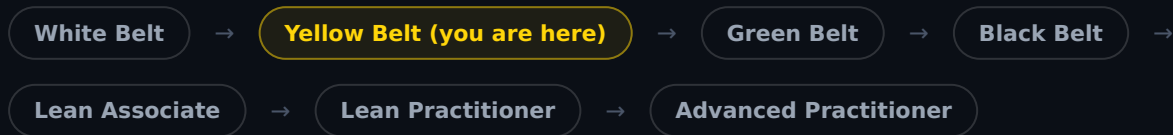

A Yellow Belt certificate of completion, a digital badge for LinkedIn, and lifetime access to every lesson and resource — so you can come back and refresh any tool whenever a real project calls for it.

SimplicityHub® is a recognised training provider for the Council for Six Sigma Certification (CSSC) — so your Yellow Belt certificate carries external, third-party recognition, not just our own word for it.

Where Yellow Belt fits in **your journey**

Yellow Belt is your foundation. Most learners use it as the launchpad into the full belt ladder — each level builds directly on the last, so nothing you learn here goes to waste.

Ready to build real momentum?

Once you pass your exam, keep an eye on your inbox — we occasionally send existing learners a discounted invite to the next belt up. No pressure, just an easy way to keep progressing if and when you're ready.

We're genuinely glad you're here — welcome to SimplicityHub®. If anything is ever unclear on the course, or you just want to talk through a real project you're working on, our inbox is always open.
